

PGY-5

Dr. Ilya Laufer completed undergraduate studies at Columbia College where he majored in Neuroscience and Behavior. As an I.I. Rabi Research Scholar he worked with several academic mentors studying cortical circuitry and cerebrovascular disease and continued his research in translational and basic science as a medical student. Having graduated from SUNY Stony Brook School of Medicine in 2004, Ilya started his neurosurgical training at the New York - Presbyterian Hospital/Weill-Cornell Medical College. As a CNS/Synthes Spine Fellow, Dr. Laufer obtained a Master of Science degree from the Biostatistics Department at the Columbia University Mailman School of Public Health having completed the Clinical Research Methods track. He is primarily interested in degenerative and oncologic disease of the spine and in design and implementation of clinical trials.
