

PGY-5

Justin F. Fraser, MD graduated from Princeton University in 1999, with a degree from the Woodrow Wilson School of Public and International Affairs. His Princeton thesis discussed the American healthcare system, focusing upon the effect of managed care on the physician-patient relationship. He graduated from the Weill Medical College of Cornell University in 2004. His academic interests have included the epidemiology, pathology, and treatment of cerebrovascular disorders, comprehensive approaches to skull base surgery including neuroendoscopy, treatment of complex spine pathology, intraoperative tools in neurosurgery, and the clinical and scientific aspects of functional neurosurgery.
